STRENGTHEN YOUR TECHNICAL SKILLS IN AGILE DEVELOPMENT

Are you a technical person in an agile environment? Do you want to understand all the technical elements involved in being agile? If your answer is YES, then join the 5-day Certified Scrum Developer® (CSD®) course to get a full understanding of the Agile mindset, the Scrum framework and how to handle technical aspects of being agile.

You can expect a highly interactive and fun 5-days training where you will be challenged on your knowledge through exercises and simulations, as well as where the facts will be combined with practical examples – and yes you will be coding!

On completion of the full 5-days training, you will be credited with an internationally recognized Certified Scrum Developer® certificate (CSD®) from Scrum Alliance.

About the trainer

Mario Melo

Certified Scrum Developer Trainer

Mario began his career as a developer in 2004 and was one of the first Scrum Alliance official trainers to be awarded the Certified Scrum Developer (CSD) certification in Brazil. Since 2014, he has been working as a trainer and coach in Brazil and Europe, working with clients such as Nokia, Siemens, PPF Tech, Outsystems, Energias de Portugal (EDP) and others.

Malene Jacobsen

Co-Trainer

Malene will be co-training the course with Mario. Malene is one of the few people that has never done a Waterfall project. She was first exposed to agile and Scrum during her education in Advanced Computer Science and since then it has become a natural way of thinking both in work and her private life. Malene fully lives up to the saying: 'you don't do Agile, you become Agile!'

Why us?

- Guarantee first-hand practical guidance from international expert.
- You will gain valuable insight and inspiration which likely will inspire you to be a game changer yourself.
- You will receive frequent post-course follow-ups: Both Iain and Malene believe that your training course is the start of a life-long journey of continuous improvement and they are available to assist you on that journey in any way possible.
